SUMMARY

Software Engineer with 4+ years of experience building and maintaining web applications using TypeScript, JavaScript, React, and Next.js. Experienced in developing production features, integrating APIs and payment systems, troubleshooting application issues, and contributing to open-source projects. Built and shipped products across fintech, AI, and consumer software, with 40+ merged open-source contributions and multiple hackathon recognitions.

TECHNICAL SKILLS

- Languages: TypeScript, JavaScript, HTML, CSS
- Frontend: React, Next.js, Tailwind CSS, Responsive UI, Component Architecture
- Backend & APIs: Node.js, REST APIs, Authentication
- Databases & Infrastructure: PostgreSQL, Supabase, Vercel
- Payments & Web3: Paystack, Bitcoin, Lightning Network, Breez SDK
- Tools: Git, GitHub, Postman, Jest, Figma

PROFESSIONAL EXPERIENCE

Teaching Assistant | NYSC **January 2025 - January 2026**

- Supported classroom activities, assessed student assignments and tests, and maintained accurate academic records across three classes.
- Assisted teachers with classroom administration and student performance tracking.

Software Developer | LW INC **March 2024 - January 2025**

- Built and maintained production web applications using React, TypeScript, JavaScript, and Node.js, integrating APIs, authentication systems, and reusable components.
- Resolved 10+ technical issues weekly across application, API, authentication, and user-facing workflows.
- Helped reduce repeat technical requests by 59% through improved troubleshooting, documentation, and product-level fixes.

Full-Stack Developer Intern | Chuuse Inc **June 2022 - February 2024**

- Built and maintained product features using JavaScript, React, and backend APIs, covering authentication, onboarding and notifications.
- Collaborated with product and engineering teams to troubleshoot production issues and improve platform reliability, performance, and user experience.

SELECTED PROJECTS

RECUR *Full-Stack Developer | 2026*

AI-assisted payment reconciliation platform that connects incoming transactions to customer records and invoices

- Built reconciliation workflows using React, TypeScript, Supabase, and PostgreSQL.
- Implemented transaction matching, exception handling, invoice updates, and outstanding balance tracking.
- Integrated Paystack payment events and QuickBooks workflows.
- Tested the product with Yetlaw Environmental Services, a waste management company managing over 2,000 customers.
- Reduced bank statement transaction extraction from approximately 24 hours to one minute in Yetlaw's workflow.

ZAPCART *Full-Stack Developer | 2026*

Bitcoin Lightning-powered sales and inventory platform for small merchants

- Built merchant sales, inventory, checkout, and payment workflows using TypeScript, React, Node.js, Supabase, and Breez SDK.
- Integrated Lightning payments, including payment confirmation and transaction tracking.
- Tested with 10 merchants, with seven becoming active users.
- Won Best Breez SDK Project at Hack4Freedom Lagos 2026.

FIX Full-Stack Developer | Apify × She Code Africa BuildHer Challenge | 2026

AI-powered equipment troubleshooting assistant agent that specializes in converting natural-language problem descriptions into contextual diagnostic guidance.

- Built an AI-powered troubleshooting assistant that converts natural-language equipment problems into structured diagnostic guidance.
- Implemented the application and API workflow connecting user input, AI processing, and actionable recommendations.
- Selected among the Top 10 projects in the challenge.

KNIFEBUD Product Designer & Developer | 2026

Consumer product redesign focused on improving usability, navigation, and the overall user journey.

- Redesigned core interfaces and user journeys, improving navigation and information architecture.
- Built interactive prototypes and iterated on the experience using user feedback.

OPEN-SOURCE CONTRIBUTIONS & RECOGNITION

- 40+ merged contributions across Bitcoin and related open-source projects, including Bitcoin Plain Talk and Polar.
- 32+ merged Yoruba translation pull requests to Bitcoin Plain Talk.
- Best Breez SDK Project - Hack4Freedom Lagos, 2026.
- Best UI/UX - WID × Dreamspace Apathon, 2026.
- Top 10 - Apify × She Code Africa BuildHer Challenge, 2026.
- 100% Score - Google DeepMind Train a Small Language Model Challenge Lab, 2026.

EDUCATION & CERTIFICATIONS

B.Eng Computer Engineering **2017-2023**
University of Benin
CGPA: 4.12 / 5.00

Certifications: Meta Frontend Developer Professional Certificate (2025) · Certified Nomba Developer (2026) · Deloitte Technology Job Simulation (2025) · Chuuse Inc. Certificate (2022)

Professional Membership: Graduate Member, Nigerian Society of Engineers (GMNSE)
